Bulletin #2009-003 19 – February - 2009

Subject:
Production Category fuel tank capacity

Overview:
Effective immediately, replace Article 10.2.B.24 with the following:

24. Fuel Cells

Fuel cells~~, not to exceed the capacity of the stock fuel tank, or 15 gallons (whichever is greater),~~ are allowed to replace stock fuel tanks. Location is unrestricted. Fitting of such cells must conform to Article 5.7. Rerouting of fuel lines is permitted. Fuel lines that pass through the passenger compartment must be as prescribed in Article 5.7 of these Rules.

Rationale:
This change is intended to allow Canadian Production Category competitors to compete in RA events without their CARS legal (typically 80L) fuel cells being illegal and to allow for greater capacity for alternate fuels with greater consumption rates (i.e., methanol, ethanol, E85).

Questions regarding this bulletin received by Rally America from licensed Drivers and Co-Drivers will be answered in writing.
